Technical Data Sheet.

Foil With Adhesive Backing.

Specialty designed for taping joints and seams against moisture and vapor on foil jacketing facing.

FEATURES:

- Dead soft aluminum foil
- Excellent adhesion and quick stick
- Strong densified kraft liner

BENEFITS:

- Conformability to curved surfaces
- Strong bond to a variety of substances
- Product reliability

CONSTRUCTION:

Carrier: Aluminum Foil
Adhesive: Rubber
Liner: Densified Kraft.

THE LISTED VALUES ARE TYPICAL AND NOT INTENDED TO SERVE AS PRODUCT SPECIFICATIONS.

APPLICATION TECHNIQUES:

- It is essential, as with all pressure-sensitive tapes, that the surface to which the tape is applied be clean, dry, and free of grease or oil.
- Bond strength is dependent upon the amount of adhesive-to-surface contact developed
- Note that different pressure, time and temperature on different (film/rigid) surface achieves different performance.

STORAGE / SHELF LIFE

- One year when stored at 64-72°F (18-22°C) / 30-70% relative humidity, out of direct sunlight and in original packaging.
